

Hello

I'm writing to tell you that consolidating media ownership is not a good idea for the general welfare of an informed populace. We do not need to have radio/TV/print media held by a few corporations. In fact, it would serve the country better if each station and newspaper were independently owned and operated. I understand that won't happen. but the present plan to open media ownership to the market is a bad one: this is one place where de-regulation will result in harm to our republic.

I urge you to not do this, to not allow media ownership to be de-regulated. Thank you.
